## **NATIONAL CORVETTE MUSEUM (NCM) REPORT**

The Corvette Museum continues to deliver 2021 Corvettes and is currently having a 4th of July sale in its store. The Bowling Green Factory continues to produce about 185 cars a day and intermingles RHD cars for export. Parts for production have caught up finally and they do not foresee anymore delays as they had in the spring. Order guides for the 2022 model are available for Dealers and will soon be available for the public to spec out. A modest increase in price was announced on the 2022 and later this year the information for the Z06 should be announced with projected 2023 for production.

Keep Driving your Corvettes; see you on the Road.

## **GUIDE DOGS FOR THE BLIND (GDB) REPORT**

Hi everyone,

This month our club's puppies got together for a nice trail hike led by Kathleen. It was a nice trail and a different, but a good, socialization experience for the puppies. Visually impaired folks like their dogs to be able to handle all kinds of environments and surfaces so we try to work this in our training.

Cam wore his jacket for a while and then he got to walk a bit without it just like Jack who is still on his special training protocol. Things are getting back to normal so we will have our club meeting in July at our normal meeting place prior to the COVID lock down. It's been over a year. We hope to have some new interested people join us to join in the love of raising these awesome dogs.

Malta is still in phase 7 and we are hoping for a match soon. We are still waiting to hear on Lyrics hearing impaired training with the Sam Simon Foundation.

Until next month have a tail waggin day!

# **National Corvette Day**

## **June 30, 2021**

National Corvette Day is celebrated every year, on June 30. It gives Americans the opportunity to celebrate a major accomplishment in their automobile history. It is a great time to learn about how the Corvette became a part of modern American history by pushing The limits of technology and making the American automobile industry a symbol of industrial genius.

### **HISTORY OF NATIONAL CORVETTE DAY**

National Corvette Day is celebrated as a remembrance of the origins of the Corvette — the iconic American Sports automobile. The model was introduced in 1953 by the General Motors automobile factory in Michigan. The unique design and sturdiness of the Corvette made it widely popular and it soon became a symbol of American industry and national pride.

In 2008, the American House of Representatives announced that June 30 would be commemorated as National Corvette Day. Incidentally, this was the year when GM had completed 100 years of its operations, which made it the right time to dedicate an entire day in the national calendar to celebrate an important milestone.

Another interesting fact is that 2008 was also the year when the American automobile industry, and the entire economy for that matter, was undergoing a huge crisis. It was the biggest crisis since the Great Depression and was being felt quite severely by the automobile industry, including General Motors. Therefore, by announcing National Corvette Day, the government also intended to reduce some of the gloom and doom that was being spread about the American automobile industry by celebrating one of its most remarkable achievements.

The decision proved to be timely and well-received because since then National Corvette Day has been celebrated regularly across America and the automobile industry has also recovered from the crisis. Today, celebrating National Corvette Day has become a symbol of the American people's faith in their automobile industry and confidence in its prosperous future.

Happy Birthday to You!
